Customer Reviews

I just passed the FNP boards and listening to these CDs helped me tremendously! I used the 2011 edition, and the guidelines were current and applicable to the exam questions, as most of the guidelines have not changed recently - i.e. asthma, diabetes treatment, and much of the exam relates to assessment and diagnostic skills, which have not changed for a very long time! Margaret Fitzgerald is easy to listen to, keeps you engaged, helps you organize your thoughts in approaching the questions, and provides a thorough review for the exam. It was nice to have the CDs to listen to while in the car to and from clinical, etc. I listened to the CDs 3-4 times and used her "Nurse Practitioner Certification Examination and Practice Preparation" review book (ISBN: 0803621329) NURSE PRACTITIONER CERTIFICATION EXAMINATION AND PRACTICE PREPARATION that has ~1400 questions and TONS of supportive information--also essential for studying. I did this review book cover-to-cover and it has all of the tables/charts included in the workbook that typically comes with the CDs (if you buy them full-price off of her website) AND A LOT MORE, so the CD workbook is not necessary. I had many classmates working on various review books and resources, but I think sticking to one is the best way to go to avoid getting confused. With these CDs, the separate review book (mentioned above), and the website link provided on the back of the CD case

with free access to additional study materials from FHEA--you will be well prepared! Good luck!

I totally agree with all other reviews! This has proven helpful in preparing for clinicals and exams while in the program as well! I listen (downloaded to my iPod) to the selected topic or objective of the day on my way to clinicals. Fitzgerald has a way of emphasizing critical points and easy tactics for remembering important information. While I am still a year out from graduation, I am glad I purchased this book and discs to help get me through my FNP program as all of our exams are formatted similar NP boards.

I'm extremely satisfied with my purchase & the timeliness of the delivery! I would encourage anyone with a busy lifestyle and trying to complete their graduate nursing degree as a practitioner to order this product, read the workbook, and listen to the audio on-the-go! Fitzgerald's teaching style makes the lecture interesting. You won't have a dull moment! !!

I TRIED TO LOG ON to the online materials, practice tests, extra study materials, and was denied access. Apparently, this is an incomplete product and Fitzgerald health associates said that it was being sold illegally on this site. I had to spend extra money to purchase a separate set of practice tests. I am beyond angry.

Excellent program, expect it will be very helpful in preparing for the exam! CD's were in good condition and complete.

These CDs are a must have!! Very beneficial and helpful with the test. More than enough material and topics reviewed. I would suggest her review book to go along with the CDs. These CDs I received were scratched so I missed some material. So be careful

This review is a must for NP students. I did this instead of the live lecture and found it to be more my pace. It arrived in excellent condition and I had no problems with it.

Review CDs are excellent for not only the NP certification review but for school in general. I highly recommend this product to any NP student. Fitzgerald is very thorough with an excellent accompanying manual.
