Secret Science And The Secret Space Program

Synopsis

There are areas of science that are off limits to the public and are not taught in our universities. The science and technology of anti-gravity and extracting energy from space itself was developed in the late 19th and early 20th century by scientists and experimenters like John Worrell Keely, Nicola Tesla, and Thomas Townsend Brown. But today, this science is purposely overlooked and regulated to the world of "Black Projects." The publicly acknowledged space program is but a "smoke screen" to hide a secret space program, overseen by NSA, the CIA and a secret branch of the U.N., that is so secret that even some U.S. Presidents and Congressional oversight committees are not even aware of it. Secret Science and the Secret Space Program will document and provide an in depth look at this secret science and technology and the secret space program that has already colonized Mars, built bases on our Moon and other planet's moons and given us the ability to travel to the stars. "Black" science is so far ahead of acknowledged science that this book will seem like science fiction to many who read it.

Book Information

Paperback: 212 pages

Publisher: Herbert Grove Dorsey III (November 12, 2014)

Language: English

ISBN-10: 057815238X

ISBN-13: 978-0578152387

Product Dimensions: 6 x 0.5 x 9 inches

Shipping Weight: 10.4 ounces (View shipping rates and policies)

Customer Reviews

This is an exceptional book for several reasons:1. The first two chapters tell much of the history of suppressed inventions that reportedly produced more power and energy than expected, and tell of the very credible attempts by powerful people to suppress these inventions for financial reasons. Many of them are supported by patent numbers, adding excellent credibility.2. Although a scientist not exposed to anomalistic data (such as might be available in meetings about UFOs) might have

difficulty even thinking about such things as time travel or Nazi flying saucers, those who are familiar with these topics will recognize the discussion as both logical and helpful. This reviewer thought they contained excellent information consistent with current whistleblower reports.³ The discussion and description of the various space fleets and their relations to covert reverse-engineered alien UFO technology is quite illuminating if historically accurate. The use of time travel â œjump gatesâ • to go to Mars will surely stretch the credibility for most readers but for this reader it merely made me hunger for more confirmation sources beyond website names. I would hope and expect that some of the 12 references would offer such confirmation.⁴ The amazing level of detail of some aspects (e.g., Ed Dames teaching a class on training young people for Mars expeditions, with Barack Obama auditing the class) do indeed call for some sort of evidence.⁵ Actually, for me, the book was so interesting that I was dismayed by the large number of typing and spelling errors that have the effect of reducing the credibility for the wrong reason.
